

CS150P (Lab)

February – June 2014 Semester

Grading Scheme

Grading Scheme

Weightage

Lab Assignments: 75% (11 assignments total)

Final Exam: 25% (Consists of a programming exercise and a Viva-voce)

Grading Scheme

Lab 1 assignment will be graded on a 5-point scale and each of the remaining 10 lab assignments will be graded on a 10-point scale as per the guidelines below:

+2 = Pseudocode and C-code has been written in the lab book before coming to lab

+2 = Code maintains a good variable convention and coding style

+2 = Code is adequately commented

+2 = Code compiles without warnings

+2 = Code generates the desired output

Please give a student a 0/10 if the student does not turn up for his/her lab. In case the student completes the assignment in the make-up week, then the 0 score could be revised accordingly. The score obtained in each lab assignment will be added into a total and the total will be scaled to 75 points. If the students finish the assignment before time, they may be given extra credit, more challenging, problems to work on. Although opting for these problems by the students is optional. Each extra credit problem will be evaluated to a maximum of 2-point scale and will be considered as bonus marks gained by the student.
